

OpenText Documentum Health-Check

Situation

In today's complex, highly-networked business-critical systems, performance bottlenecks can often prevent you from fully exploiting the potential of your ECM infrastructure. Your staff may struggle with excessive system response times, costing valuable work hours and placing a strain on your budget. Do you suspect your web application could be used more effectively? Do you deal with data replication in distributed environments? Would you like to know how many simultaneous OpenText Documentum users you could serve at sufficient performance levels? Maybe you are planning a substantial increase in the number of users for your OpenText Documentum or OpenText Documentum for Life Sciences applications and need to ensure your system can be scaled up accordingly? We have the solution for you!

Benefits

We provide expertise and assistance on how to make your system perform better. As a result you receive documented, professional recommendations for optimizing the performance of your application(s), an analysis of the system's weak points and an in depth analysis of your Documentum architecture. The timely elimination of system bottlenecks and the resulting efficiency improvements of your business critical applications may provide you with competitive advantages in today's fast moving markets.

Services

We offer you a complete Health Check of your OpenText Documentum infrastructure as a fixed price consulting package, geared to meeting your specific performance needs. This may typically include:

- Appraisal of the factors impacting performance in view of user requirements
- Conformity verification regarding the software versions deployed
- Analysis of optimization potential in the OpenText Documentum configuration
- Log file analysis
- Review of the OpenText Documentum architecture
- Preparation of application load and stress tests

Results

The aim of the OpenText Documentum Health Check is to provide you with an overview of the weaknesses of your application setup as well as a detailed list of recommendations for performance enhancing remedies, enabling you to successfully define and implement the appropriate optimizing measures. If desired, we also present the results in form of a PowerPoint presentation to your management team.

Competence

fme has been an OpenText Documentum Partner for many years. 20 years of corresponding project experience are proof of our product and consulting experience. Our staff disposes of substantial know-how in analyzing and optimizing performance issues in Documentum applications.
